Homecare Instructions

Date: _____

Pet's Name: _____

- ✓ Your pet should rest for 3 days. Don't run or play. Stay quiet. No jumping!
- ✓ Keep your pet indoors or outside in a safe area.
- ✓ Feed your pet at supper tonight and then return to their regular feeding routine tomorrow.
- ✓ If there are any problems with the incision, please come back and see us!
- ✓ We gave your pet some pain medication so they should feel comfortable. If you feel your pet is experiencing pain, please come and see us so that we can help.
- ✓ Rabies and distemper vaccines were given today and we treated your pet for parasites (worms, fleas) too!

**Your pet did very well in the operation today and you have helped
reduce the overpopulation of pets in your community!**

We thank you for your help. As you can see it is very important to us.

We have enjoyed our time with you and your community.

See you next year!
